

Vikan Site Survey

Your path to hygiene leadership starts here

What a Vikan Site Survey can do for you

- Improve and standardise your hygiene setup
- Get a complete overview of your cleaning tools
- Implement a colour coding plan or update your existing one
- Prepare more effectively for audits
- Rationalise your cleaning tool deployment
- Solve specific cleaning challenges
- Move hygiene further up the agenda at your plant!

Why just 'pass' when you can lead?

"I have been using Vikan products for over 10 years in the food industry, and they are always my first choice for cleaning equipment."

Garry Manton, Hygiene Manager, Fairfax Meadow, United Kingdom

If you have a factory audit scheduled for the near future, you'll naturally want to satisfy inspectors and earn a stamp of approval for your hygiene operations.

A Vikan Site Survey is a great way to improve the certainty of passing – and in fact to move beyond just passing audits to getting ahead of the field as a hygiene leader. A Site Survey involves a thorough inspection of your plant with a view to identifying and

solving hygiene problems before the auditors find them.

Together, we'll consider everything, from how well your current colour coding plan matches your current needs and activities, to whether each of your work areas is equipped with the latest, most appropriate cleaning tools.

Site Surveys are **free of charge** and **100% confidential**.

COLOUR CODING SYSTEM

Every Vikan Site Survey starts with a thorough assessment of your current colour coding system and cleaning tool inventory.

REGULATORY COMPLIANCE

Moving from workstation to workstation, we'll check documented compliance with applicable cleaning tool standards, including "approved for food contact," FSSC 22000, IFS and BRC.

BRCS | In Partnership with

GAPS AND OPTIMISATIONS

For each location, we identify missing tools and provide recommendations for maintenance, replacement schedules and optimised practices.

BETTER TOOLS FOR THE JOB?

If there's a better tool available for a certain job, we'll let you know and, where possible, give you a chance to try our recommended solution for free.

CLEANING TOOL STORAGE

To promote good hygiene practices and extend the life of your colour-coded products, we help ensure that your cleaning tools are stored correctly.

Now you're ready to lead

Following the survey, Vikan will send you a comprehensive set of insights and recommendations to guide you until your next follow-up survey.

Your Site Survey Report includes:

- Survey summary
- Location overview
- Factory layout colour coding plan
- Vikan recommendations
- Suggested order form
- Follow-up survey proposal

To schedule your Site Survey, talk to your Vikan sales representative or distributor today!

ABOUT VIKAN

Vikan is the world's leading supplier of hygienic cleaning tools for the food and beverage industry and other hygiene-sensitive environments. With headquarters in Denmark and over a century of experience, we've amassed the industry's biggest bank of hygiene and regulatory insight, and used this to develop the world's most effective professional cleaning tools and advisory services. All to make sure that you can deliver each and every product you manufacture with pride and confidence.
